

Warm Packs

Caring for the elderly at home

Warm Packs have proven to be a great boost for the tens of thousands of elderly people receiving Care at Home during the winter months.

Last winter IDC supplied over 4,000 'warm packs' distributed by local authorities to the elderly at home.

Warm Packs help combat the effects of a cold winter, raise morale and strengthen 'care' in the community

Each warm pack contains:

Hot Water Bottle • Fleece Blanket • Thermal Mug
Pack of Cup Soups • Pair of Bed Socks
